

ACTION PLAN (2025-2026)

Presented at
Action Plan Meeting
held at
TNAU, Coimbatore
on
24th & 26th March, 2025

ICAR – KRISHI VIGYAN KENDRA
(Host : Sri Avinashilingam Educational Institutions)
Vivekanandapuram, Karamadai
Coimbatore – 641113

ICAR-Agricultural Technology Application Research Institute (ICAR-ATARI)

ACTION PLAN 2025-26

1. General information about the Krishi Vigyan Kendra

1.1 Name of the KVK	ICAR - Krishi Vigyan Kendra, Coimbatore
Address	Vivekanandapuram – 641 113, Karamadai Block, Coimbatore District. TamilNadu.
Phone	Phone : (04254) 297820, 6382816174
e-mail	sakvk.cbe@rediffmail.com, avinashilingamkvk@gmail.com
1.2. Name of host organization	Sri Avinashilingam Educational Trust Institutions
Address	Saradhalaya, Bharathi Park Road, Coimbatore – 641 043. TamilNadu
Phone	(0422) 2440 241
e-mail	avinashilingamtrustoffice@gmail.com
1.3. Year of sanction	1979
1.4. Website of the KVK	www.avinashilingamkvk.org
Date of last update	10.07.2025

1.5. District map with location of the KVK

GPS reading (from Google Maps) of the Entrance of KVK 11.2389423,76.8779039

		
	District	: Coimbatore
	State	: TamilNadu
	Latitude	: 11.2389423
	Longitude	: 76.8779039
	Mean Sea Level	: 352 M

2. Details of staff as on date 1st April 2025

S.No.	Sanctioned post	Name	Discipline	Date of joining	Present pay scale (7 CPC)
1	Senior Scientist & Head	Vacant	-	-	-
2	SMS 1	N.Suganthi	Soil Science	02.01.2006	95500
3	SMS 2	P.Gomathi	Home Science	19.11.2007	90000
4	SMS 3	S.Sureshkumar	Agronomy	08.09.2010	82400
5	SMS 4	M.Sagadevan	Horticulture	09.09.2010	82400
6	SMS 5	Vacant	Animal Science	-	-
7	SMS 6	Vacant	Agri. Engg	-	-
8	Programme Assistant/T4-1	D.Ravindran	Comp Science	01.08.1992	70000
9	Farm Manager/T4	V.Muthukumar	Botany	17.07.1988	70000
10	Programme Assistant/T4-2	P Pavithra	Soil Science	01.02.2023	37600
11	Administrative Staff 1 (Assistant)	V.Palaniswamy	Commerce	16.04.2012	50500
12	Administrative Staff 2 (Stenographer Grade III)	E Gopal	Electronic Media	01.02.2023	27100
13	Driver/T1 - 1	L.Premkumar	Nil	01.07.2002	37200
14	Driver/T1 - 2	D.Samuvel Johnson	Nil	04.10.2010	32000
15	Supporting Staff 1	N.Veerasingam	Nil	01.08.2009	28800
16	Supporting Staff 2	P.Pavithra	Nil	28.06.2019	20900

3. Details of SAC meeting(s) conducted during 2025-26:

Date of SAC meeting Conducted: 44th Meeting held on 19.03.2025

Suggestions and recommendations of the SAC and Action Taken on the Recommendations

S. No	Member	Recommendations/Suggestions
1.	Dr.P.P.Murugan, Director of Extension Education, TNAU, Coimbatore.	❖ KVK should take step to recruits Senior Scientist and head, SMS Animal Science, Agriculture Engineering for effective function of KVK ❖ Kendra should take awareness on Soil health management, organic farming, Nutrigarden, Drone usage, Value addition in millet, Ornamental fish culture, Vermicomposting, Mushroom production, Apiculture ❖ KVK should document all success stories of farmers, entrepreneurs ❖ Develop report on Government scheme of State and Central Collaborate with other Central institute for exposure visit and farmers Mela
2.	Dr. Krishnaveni Joint Director of Agriculture Coimbatore.	❖ KVK can work together with agriculture department to popularize latest technologies in agriculture
3	Dr. S. Sukumar	❖ To motivate farmers for timely vaccination and deworming.

	Regional Joint Director of AH, Coimbatore	❖ Create awareness on calf rearing and infertility management in cattle
4	Dr. Rajula Shanthi Principal Scientist, ICAR – Sugarcane Breeding Institute, Coimbatore.	❖ To create awareness on short duration Sugarcane variety like CO 11015 , CO 86032 to the farmers ❖ To promote SBI integrated farming model for sustainable farming ❖ To create awareness on entrepreneurs development programme on sugarcane production
5	Dr. T. Senthil Kumar Principal Scientist, ICAR - Centre Institute of Agriculture Engineering, Coimbatore.	❖ KVK should recruit SMS Agriculture Engineer to support Coimbatore district farmers ❖ Kendra can include Banana injector, banana fiber extractor onion planter and cassava harvester in demonstration programmes ❖ KVK can facilitate Farm machinery and equipment maintenance to the service providers
6	Dr. R. Arumugam Prof & Head TANUVAS Training Centre Saravanampatty Coimbatore	❖ To promote TNAUVAS technologies to enhance fodder and milk production. ❖ To create awareness on mixed fodder bank and balance nutrition to the livestock. ❖ To promote small poultry unit, calf rearing unit and backyard poultry to the farmers ❖ Create awareness on mastitis management and other vaccination for livestock and poultry ❖ To facilitate direct selling outlet for fresh milk to consumers
7	Dr. Usha Rani Principal Scientist, ICAR – Central Institute of Cotton Research, Coimbatore.	❖ Create awareness on precision farming in cotton ❖ Can organize exposure visit to CICR Coimbatore for learning latest technologies in cotton farming
8	Mr. Jitendhar Lead Bank Manager, Canara Bank, Coimbatore.	❖ Can create awareness on KCC and other financial assistant to agriculture and Allied sectors
9	Ms. Madhubala Assistant Director of Horticulture, Coimbatore.	❖ Need more training on latest technologies in horticulture to extension functionaries ❖ Provide skill training of apiculture, nursery management and mushroom production to the entrepreneurs ❖ Create awareness on white fly management through cluster approach
10	M. Sivasankar .M Assistant Inspector of Sericulture Department of Sericulture	❖ Promote quality mulberry seedlings to the farmers through KVK

11	Mrs. Haseena Assistant Engineer Agriculture Engineering Department	❖ To facilitate skill training programme to maintaining farm machineries in convergence with department of agriculture engineering ❖ To create awareness on government subsidies schemes to the farmers
12	Sri. Muthusamy Chairman, Aranganathar FPO, Karamadai, Coimbatore Dt	❖ To facilitate market outlet for organic products, value added products and fresh milk
13	Mr. Rangasamy Chairman, Aram FPO, Karamadai, Coimbatore Dt	❖ To create awareness on importance of soil and water testing and organic carbon to the farmers.
14	Mr. Ponrajprabhu Progressive farmer, Pannimadai village Periyanaickenpalayam Block, Coimbatore District	❖ Provide skill training for machinery operation, drone spraying and other agricultural operations. ❖ Provide trainings on fisheries, piggery and organic farming to needed farmers. ❖ Create awareness on subsidies to be available for women entrepreneurs.
15	Mr. Thiruvengadam Chairman, Pasumai FPO, Perumpathy, Kinathukadavu	❖ Create awareness TNAU cococon and Whitefly Management Technology to coconut farmers
16	Krishnasamy FPG Chairman and Progressive farmer Thondamuthur block	❖ To create awareness on Bee keeping, Soil testing and solar drier.
17	Mr. Balakrishnan Progressive farmer, Pathuvampally Village Sulur Block, Coimbatore District	❖ Facilitate micro nutrient analysis in soil through KVK. ❖ Create awareness on Azolla production, Biochar production, Nematode management in vegetable, mineral mixture for animal, integrated pest management in coconut.
18	Mr. Ajith Progressive farmer, RM Pudur Village Anaimalai Block, Coimbatore District	❖ Create awareness on Integrated nutrient and pest management in coconut production and in paddy mechanization.
19	Mrs. Lalitha Progressive farm women Idikarai village, SSKulam Block, Coimbatore District	❖ Create awareness on medicinal plants, poultry farming and organic farming.
20	Mrs. Vasanthamani Progressive farm women Koothamandi village, Karamadai Block, Coimbatore District	❖ To give importance of organic farming and market facility for organic banana

21	Mr. Kaliyappan Progressive farmer, Allapalayam village Annur Block, Coimbatore Dt	❖ To facilitate mobile soil and water testing to farmers through KVK ❖ To promote millet value addition and creating awareness on marketing
22	Mrs. Soundara Jothi Progressive Organic farmer, Kuppichipalayam village, Periyanaickenpalayam Block, Coimbatore District	❖ Create storage godown facility for Bengal gram and cotton. ❖ Create awareness on water recycling, organic farming and postharvest machineries in Bengalgram.
23	Dhanraj Progressive farmer, Kinathukadavu Coimbatore District	❖ Create awareness on small equipment's in cotton picking and market outlet facilities for cotton and tomato.
24	Venugopal Progressive farmer, Anaimalai Block Coimbatore district	❖ Need trainings for Paddy straw mushroom production and fish rearing technologies.
25	Mr. Manikandan Progressive entrepreneur Nallampalayam Coimbatore district	❖ To create awareness on “Api therapy” economic beneficial insects, bio-fencing and other government scheme to the farmers

Proposed date/month of SAC Meeting to be held in 2025-26: 45th Meeting, last week of Dec 2025

4.0 Capacity Building activities planned for KVK Staff

4.1. Plan of Human Resource Development of KVK personnel during 2025-26

S. No	Name of the Head/ SMS/Staff	Area of Training	Institution proposed to attend	Duration	Dates (dd/mm/yy)
1	S.Sureshkumar	Recent Technology in Field crop	TNAU, Coimbatore	5 days	25/01/2026
2	M.Sagadevan	Recent production technology	IIHR, Bangalore	5 days	11/09/2025
3	P.Gomathi	Post-harvest management of fruits &Vegetables	IICPT Thanjavur	3 days	15/10/2025
4	N.Suganthi	On farm production of bio inputs	NIPHM, Hyderabad	3 days	14/10/2025
5	Animal science	Recent technologies in Livestock	TANUVAS, Namakkal	3 days	12/10/25
6	Agri Engg	Mechanization	CIAE, Bhubal	5 days	12/11/25
7	P.Pavithra	Soil and water testing	IARI, New Delhi	3 days	10/12/25

5. Cross-learning across KVKs planned during 2025-26

S.No.	What expertise/ resources KVK can offer/ share to other KVKs		What you expect from other KVKs	
	Subject area/ resource/ expertise	Mention Other KVK	Subject area/ resource/ expertise	Mention source KVK
1	FPO Activities	Erode	FPO	KVK Erode
2	Demonstration units and FPO activities	Vellore	Maintenance of Demo units	KVK Vellore
3	Demonstration units and FPO activities	Dharmapuri	Maintenance of Demo units	KVK Dharmapuri

6 . Operational areas proposed during 2025-26

6.1. Details of operational area/cluster villages

District/Taluk/ Block	Major crops & enterprises	Prioritized problems in these crops/ enterprise	Extent of area (ha/No.) affected	Names of cluster Villages identified for intervention	Proposed intervention
Coimbatore/ Periyanaicken palayam	Turmeric	Cultivation of old variety, Poor yield, Labour Scarcity	47	Selvapuram	FLDs, Method demonstration and Training
	Nutri garden garden	Lack of Knowledge about importance of Nutrigarden	-	Kuppuchipalayam	FLD, Method demonstration, Training
Coimbatore/ Anaimalai	Paddy	Micronutrient deficiency, Poor tillering, Low yield Pest and Disease and labour scarcity	220	Vadachitur	FLD, Training and Field Day
Coimbatore / Kinathukadavu	Cotton	Yield losses due to disease incidence of boll rot and labour scarcity	24	Sokkanur	FLD ,Training and Method demonstration
	Cotton	Yield losses due to pest incidence pink bollworm and labour scarcity	23	Vadapudur	FLD and Training
Coimbatore/ Karamadai	Bhendi	Yield loss due to pest and disease incidence and moderate yield of existing hybrids	27	Kuthamandi	OFT, Training and Method demonstration
	Brinjal	Yield loss due to pest and disease incidence and moderate yield of existing varieties	29	Kuthamandi	FLD Method demonstration and Training
	Finger millet	Yield losses due to poor tillering, neck blast due to continuous cultivation of local variety	35	Arakadavu	OFT, Training and Method demonstration

	Groundnut	Micronutrient deficiency, Low yield	66	Irumporai	OFT, Method demonstration, Training
	All crops	Unaware of composting technology	212	Pethikuttai	FLD, Method demonstration and Training
	Banana	Lack of knowledge about value addition	196	Karamadai	EDP Programme Method demonstration and Training
	Goat	Poor weight gain	-	Palapatti	OFT, Method demonstration, Training
	Poultry	Lack of Knowledge about new breed	-	Karamadai	FLD and Training
	Finger millet	Yield losses due to continuous cultivation of same variety	32	Senkuttai	FLD and Training
Coimbatore/ S.S.Kulam/ Annur	Greengram	Poor soil fertility, micro nutrient deficiency	124	Pasur Allapalayam Idikarai	OFT Method demonstration and Training
	Turmeric	Cultivation of old variety, Poor yield, Labour Scarcity	112	Pachagoundenur	FLDs, Method demonstration and Training
	Vegetable cowpea	Poor soil fertility, micro nutrient deficiency	69	Kanuvakkarai Allapalayam	FLD, Method demonstration and Training
	Bengalgram	Cultivation of old variety, Poor yield, Labour Scarcity	275	Idikarai, Keeranatham	OFT, Training and Method demonstration
	Dairy	Poor health	-	Allapalayam	FLD, Training and Method demonstration
Coimbatore/ Sulur	Poultry	Lack of Knowledge about new breed	-	Pathuvampalli	FLD, Training
Coimbatore/ Sultanpettai	Maize	Poor soil fertility, sucking pest infestation, and poor yield	138	Sultanpet	FLD, Training and Method demonstration

6.2. Details of adopted villages

<i>District/Taluk/ Block</i>	<i>Name of cluster villages</i>	<i>Major crops & enterprises</i>	<i>Major problems identified in each crop / enterprise</i>	<i>Proposed type of interventions</i>
Pollachi North	Perumpathi	Coconut	Kerala wilt incidence and white fly incidence	FFS, Training and Method demonstration and Field day

		Amaranthus	Low yield due to continuous cultivation of old varieties	FLD, Training and Method demonstration and Field day
		Milk	Lack of Knowledge about innovative products	FLD through EDP mode, Training and Method demonstration
		Dairy	Lack of awareness on mixed fodder production at limited area	FLD, Training and Method demonstration

6.3. Details of DFI villages

<i>District /Taluk/ Block</i>	<i>Name of cluster villages</i>	<i>Major crops & enterprises</i>	<i>Major problems identified in each crop / enterprise</i>	<i>Proposed type of interventions</i>
Coimbatore/ Madhukarai	Ellur	Coriander	Low yield and poor quality due to use of old varieties and powdery mildew incidence	OFT, Method demonstration and Training
		Ash gourd	Cultivation of old variety, Low yield due to Pest and Disease	FLDs, Method demonstration and Training
Kinathukadavu	Govindapuram/ Vadapudur	Groundnut	Poor drought tolerance ,low yielding varieties, Pest and diseases incidences	OFT, Training and Field day
		Tomato	Low yield and poor quality due to use of old varieties and pest and disease incidence	OFT, Method demonstration and Training
		Ridge gourd	Cultivation of old variety, Low yield due to Pest and Disease	FLDs, Method demonstration and Training

7. Summary (targets) of mandated activities planned for the year 2025-26

S.No	Activities	Target
1.	On- farm trials	
	a. No of OFTs	11
	b. No of Technologies (Total new technologies except FP)	22
	c. No. of locations (No. of Villages)	6
	d. No. of Beneficiaries (No. of Farmers fields)	55
	e. Area (Total area in ha)	20
2.	Frontline Demonstrations	
	a. No. of FLDs	21
	b. No. of Locations (No of villages)	11
	c. No. of Beneficiaries (No of Farmers fields)	210
	d. Area (Total Area planned in ha)	60
3.	Trainings for Farmers and Farm Women	
	a. No. of programmes	84
	b. No. of participants	1226
4.	Trainings for Rural Youth	
	a. No. of programmes	26
	b. No. of participants	437
5.	Trainings of Extension Personnel	
	a. No. of programmes	19
	b. No. of participants	325
6.	Extension Activities	
	No. of activities (Total number of activities listed in Table)	372
	No. of participants	31930
7.	Production of seed (in quintals) (Crop-wise)	3 q
8.	Production of planting materials (in Nos.) (Crop-wise)	50,000
9.	Production of live-stock strains and finger lings (Category wise Nos.)	100
10.	Production of bio inputs (quantity in kg) (Item-wise)	30 q
11.	Production of other inputs (specify unit) (Item-wise)	20 q
12.	Kisan mobile advisories	
	No. of messages	240
	No. of technologies	240
	No. of farmers	36000
	Other mobile advisories	
	No. of messages	60
	No. of technologies	60
	No. of farmers	2000
13.	Soil testing	
	No. of soil sample testing using Mobile Soil Testing Kit	100
	No. of soil sample testing in conventional laboratory	900
	Water sample Testing (samples in No.)	50
	Soil Health Cards	
	No. of Cards using Mobile Soil Testing Kit data	1000
	No. of Cards using Laboratory data	1000

8. Technology Assessment proposed during 2025-26

8.1. Summary of OFTs

S. No	Crop/enterprise	Title of intervention	Technological options TO-1 TO-2 & FP	Source of Technology TO-1 TO-2	Status	No. of trials (replications)	Total cost involved (Rs.)	Team members involved	No. of trials targeted in DFI village(s)	No. of trials targeted under SC-SP
1	Bengalgram	Assessment of high yielding Bengalgram varieties in Coimbatore district	TO 1: NBeG 776 TO 2:NBeG 857 FP:JAKKI :9218	ARS,Nanthiyal, 2022 ARS,Nanthiyal, 2022	New	5	27,250	SMS-Agronomy	0	0
2	Finger Millet	Assess the performance and suitability of finger millet variety in Coimbatore District	TO1 :CFMV 3 TO 2 :ATL 1 FP : Co 15	ANGRAU - 2021 TNAU – 2021	New	5	5,500	SMS-Agronomy	0	5
3	Groundnut	Assessment of drought management strategies for rain fed groundnut the performance and suitability of finger millet variety in Coimbatore District	T0 1: Foliar application of 1 % PPFM at 20 DAS AND 0.5 % at 45 DAS TO 2: Drought Guard as seed treatment after diluting with water of FYM FP:No practice	TNAU, 2022 NBAIM, 2020	New	5	6,000	SMS-Agronomy	5	0
4	Tomato	Assessment of high yielding Tomato CO - 4	TO 1 : CO- 4 TO 2 : Arka Aditya FP : Sivam	To 1 : TNAU To 2 : IIHR	New	5	10000	SMS - Horticulture	0	0

5	Bhendi	Assessment of high yielding Bhendi hybrid CO(H) 5	TO 1 : CO(H) 5 TO 2 : Arka Nikita FP : VNR - Apoorva	To 1 : TNAU To 2 : IIHR	New	5	11500	SMS - Horticulture	0	5
6	Amaranthus	Assessment of high yielding Amaranthus varieties	TO 1 : PLR 2 TO 2 : Arka Suguna FP : Local cultivar	TO 1 : TNAU TO 2 : IIHR	New	5	5000	SMS - Horticulture	0	0
7	Coriander	Assessment of high yielding Coriander variety CO- 5	TO 1 : CO5 TO 2 : Suruchi FP : Delight	TO 1 : TNAU TO 2 :Dr.YSRHU	New	5	7000	SMS - Horticulture	5	0
8	Groundnut	Assessing the performance of different sources of gypsum in groundnut cultivation	TO 1 : STFR + Gypsum application TO 2 : STFR + Bacto gypsum application FP : Application of macro nutrients alone	TO 1 : TNAU TO 2 : IISR	New	5	20,000	SMS Soil Science	0	5
9	Greengram	Assessing the performance of different growth promoters in greengram	TO 1 : Soil test based fertilizer recommendation + Foliar spray of pulse wonder at flowering stage and another at 15 days interval TO 2 :	TO 1 : TNAU TO 2 : TNAU	New	5	7,750	SMS Soil Science	0	5

			Soil test based fertilizer recommendation + Foliar application of TNAU Bio Meenmix at flowering stage and another at 15 days interval FP : No foliar nutrients							
10	Groundnut	Assessing the performance of Organic Acids Coated Multi - Nutrient Fertilizers in Groundnut	TO 1 : Blanket fertilizer recommendation + TNAU MN mixture @ 12.5 kg /ha + Foliar spray of TNAU Groundnut Rich @ 5 kg/ha TO 2 : Blanket fertilizer recommendation + Organic Acids Coated Multi - Nutrient Fertilizers – 12.5 Kg /Ha + Foliar spray of TNAU Groundnut Rich @ 5 kg/ha FP : Application of macronutrients alone	To 1 : TNAU To 2 : TNAU	New	5	18,750	SMS Soil Science	5	0

11	Cattle	Assessment of Wound Healer in Goat	TO-1: Nano Heal Cream TO-2: Healex: FP : Turmeric Powder & Neem Oil	TO-1: - TRPVB, 2021 TO-2 CIRG, 2015	New	5	15000	SMS Animal Science	0	5

8.2. Details of OFTs (Use one table for each OFT) (TECHNOLOGY WRITEUP) 2025-26

OFT No.	01
Status	Continuing
Subject	Agronomy
Theme	Varietal Assessment
Category	Pulses
Crop/ enterprise	Bengalgram
Farming situation	Black cotton soil, Rain fall of 819 mm & PH ranges -7.8 to 8.9
Prioritized problem	Bengalgram is cultivated in an area of 650 ha in SS Kulam block under Rainfed condition in Rabi seasons. Farmers used to cultivate JAKKI 9218 variety by locally available seeds. The farmers facing a problem of poor yield and drought resistance.
Title of the OFT	Assessment of high yielding Bengalgram varieties in Coimbatore district
Technology options	
TO-1	Bengalgram variety NBeG 776
Source and year	(ARS Nanthiyal) 2022
Description	Duration : 90-105 days, Yield: Rain fed : 17 q/Ha., suitable for Tolerance to fusarium wilt and suitable for machine harvesting.
Potential yield/income	17 q/ha. and Rs.96,050
Critical Inputs	Seed-20 kgs <i>Bacillus subtilis</i> – 1 kg, Pulse wonder – 2 kgs
Source of Inputs	KVK, Pendakkanthee

Photos		
TO-2	Bengalgram variety NBeG 857	
Source and year	(ARS Nanthyal) 2022	
Description	Duration: 95-100 days, Yield: Rain fed : 18.2 q/ ha, suitable for mechanical harvesting and Tolerance to fusarium wilt.	
Potential yield/income	18.2 q/ kgs Rs1.02,830	
Critical inputs & quantity and cost	Seed-20 kgs, <i>Bacillus subtilis</i> – 1 kg, Pulse wonder – 2 kgs	
Source of Inputs	KVK, Pendakkanthee	
Photos		
Farmers Practice	JAKKI 9218	
Farmers yield	10.2 q/ha	
Season	Rabi 2025	
Cost per replication (Rs.)	5,450.00	
No. of replications	5	
Total cost for the OFT	27,250.00	
Parameters to be studied	No. of pods per plant , Yield(kg/ha), Incidence of pests and diseases(%), BCR	

Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS Agronomy

OFT No.	02
Status	New proposal
Subject	Agronomy
Theme	Varietal Evaluation
Category	Millet
Crop/ enterprise	Finger millet
Farming situation	Rain fed, Red sandy Soil,
Prioritized problem	Finger millet is the important millet crop cultivated over 250 ha in Coimbatore. 90 % area comes under rainfed cultivation. Farmers facing problem like poor tillering and neck blast disease due to continuous cultivation of same variety over period of time.
Title of the OFT	Assess the performance and suitability of finger millet variety in Coimbatore district
Technology options	
TO-1	CFMV - 3
Source and year	ANGRAU, 2021
Description	Duration : 120 – 125 days, Yield: 32 – 33 q / ha, Moderately resistant to leaf, finger and neck blast foot rot and banded blight.
Potential yield/income	32 q/ha. Rs 1,37,280
Critical Inputs	Seeds and bio fertilizers
Source of Inputs	TNAU

Photos	
TO-2	ATL 1
Source and year	TNAU, 2021
Description	Duration: 110 days, Yield: 31 q / ha Moderately resistant to leaf neck and finger blast. Drought tolerance, uniform maturity and Mechanized harvesting
Potential yield/income	31 q/ ha Rs.1,32,990
Critical inputs & quantity and cost	Seeds and bio fertilizers
Source of Inputs	TNAU
Photos	
Farmers Practice	Co - 15
Farmers yield	25 q / ha
Season	Kharif
Cost per replication (Rs.)	1100.00

No. of replications	5
Total cost for the OFT	5500.00
Parameters to be studied	Plant height, Number of productive tillers, grain yield and straw yield
Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/Project/Others (specify)	KVK Main
Team members	SMS Agronomy

OFT No.	03
Status	New
Subject,	Agronomy
Theme	Drought management
Category	Oilseeds
Crop/ enterprise	Groundnut
Farming situation	Rainfed farming and red laterite soil and PH ranges from 6.5 – 8.0
Prioritized problem	Groundnut cultivated about 12500 ha, in which 65 % comes under rainfed condition. Major variety VRI 2 – susceptible to water stress, pest and disease, low yield 16.8 q/ ha. 30 to 50 % yield losses due to prolonged drought.
Title of the OFT	Assessment of drought management strategies for rainfed groundnut
Technology options	
TO-1	1 % PPFM foliar spray at 20 DAS and 0.5 % KCL foliar spray at 45 DAS
Source and year	TNAU, 2022
Description	Mostly groundnut cultivated under rainfed condition and it involves strategies to mitigate the impact of water scarcity on crop yield and productivity.
Potential yield/income	23 q / ha
Critical Inputs	Drought guard and PPFM
Source of Inputs	TNAU

Photos	 
TO-2	Drought guard – It can be applied as seed treatment, dilution through irrigation water or FYM after multiplication
Source and year	NBAIM 2020
Description	Mostly groundnut cultivated under rainfed condition and it involves strategies to mitigate the impact of water scarcity on crop yield and productivity.
Potential yield/income	24 q /ha
Critical inputs & quantity and cost	Drought guard and PPFM
Source of Inputs	TNAU
Photos	
Farmers Practice	No practice
Farmers yield	--
Season	Kharif 2025

Cost per replication (Rs.)	1200.00
No. of replications	5
Total cost for the OFT	6000.00
Parameters to be studied	Plant population, Number of pods / plant, Drought tolerance level in days, Pod yield
Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/Project/Others (specify)	KVK Main
Team members	SMS Agronomy

OFT No.	04
Status	New proposal
Subject,	Horticulture
Theme	Varietal evaluation
Category	Vegetables
Crop/ enterprise	Tomato
Farming situation	Western zone, Red soil, Rain fall of 645 mm & PH ranges between 7.4 to 8.5
Prioritized problem	Yield loss (42 %) due to pest and disease incidence and moderate yield of existing Hybrids
Title of the OFT	Assessment of high yielding Tomato CO - 4
Technology options	
TO-1	CO-4
Source and year	TNAU and 2025
Description	• Harvest : 20-22 in 5 months duration • Single plant yield 2.90 kg/plant • Fruits flat round with green shoulder during ripening and turned into red colour at full ripening.
Potential yield/income	• Potential yield of 92.3 t/ha
Critical Inputs	CO-4 seeds – 100 g. 2. IIHR vegetable special – 5 kg.
Source of Inputs	TNAU

Photos			
TO-2	Arka Aditya		
Source and year	IIHR and 2019		
Description	- Plants are semi-determinate with dark green foliage, fruits are - oblate-round, firm, medium large (90-100g), - Resistant to Tomato Leaf Curl Disease (Ty₂+Ty₃), Bacterial wilt and - Early blight.		
Potential yield/income	Potential yield of 60-65 t/ha		
Critical inputs & quantity and cost	Arka Aditya seeds – 100 g. 2. IIHR vegetable special – 5 kg.		
Source of Inputs	IIHR		
Photos			
Farmers Practice	Private hybrid (Sivam)		
Farmers yield	Potential yield of 40-52 t/ha		
Season	Kharif 2025		
Cost per replication (Rs.)	Rs.2000/-		
No. of replications	5		
Total cost for the OFT	Rs.10,000.00		
Parameters to be studied	1. No. of pickings 2. leaf curl virus incidence/m ² 3. No. of fruit borer attacks/m ²		
Parameters to be reported	Yield (Q/ha) and BC Ratio		
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK- Main		

Team members	SMS (Horticulture)
OFT No.	05
Status	New proposal
Subject,	Horticulture
Theme	Varietal evaluation
Category	Vegetables
Crop/ enterprise	Bhendi
Farming situation	Western zone, Red soil, Rain fall of 715 mm & PH ranges between 7.1 to 8.2
Prioritized problem	Lack of awareness on high yielding hybrids, seed treatment techniques, High incidence of pest and diseases.
Title of the OFT	Assessment of high yielding Bhendi hybrid CO(H) 5
Technology options	
TO-1	Bhendi hybrid CO(H) 5
Source and year	TNAU and 2025
Description	Parentage- AE-CBE-92 x AE-CBE-921, Duration- 110-120 days, Season: Aadi & Thai pattam, Early in flowering (33-36 DAS), Twenty-three harvests can be made in a duration of 120 days starting from 38 days after sowing, Moderately resistant to Yellow Vein Mosaic Virus and Enation Leaf Curl Virus (ELCV)
Potential yield/income	Yield: 28.85 t/ha (15.77 % over CO 4)
Critical Inputs	1. Bhendi hybrid CO(H) 5 seeds – 300 g. 2. IIHR vegetable special – 1 kg
Source of Inputs	TNAU
Photos	
TO-2	Arka Nikita
Source and year	IIHR and 2019
Description	It can be grown in both summer and rainy seasons and is resistant to diseases like Yellow Vein Mosaic Virus (YVMV) and Okra Enation Leaf Curl Virus (OELCV) that commonly affect Okra crops. With a yield potential 21.66% higher than other varieties.
Potential yield/income	Yield: 25-27 t/ha

Critical inputs & quantity and cost	1. Arka Nikita seeds – 300 g. 2. IIHR vegetable special – 1 kg
Source of Inputs	IIHR
Photos	
Farmers Practice	VNR - Apoorva
Farmers yield	Potential yield of 20 -23 t/ha
Season	Kharif 2025
Cost per replication (Rs.)	Rs.2300/-
No. of replications	5
Total cost for the OFT	Rs.11,500.00
Parameters to be studied	1. No. of pickings 2. YMV incidence/m ² 3. No. of fruit borer attacks/m ²
Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	SCSP
Team members	SMS (Horticulture)

OFT No.	06
Status	New proposal
Subject,	Horticulture
Theme	Varietal evaluation
Category	Vegetables
Crop/ enterprise	Amaranthus
Farming situation	Western zone, Red soil, Rain fall of 685 mm & PH ranges between 7.6 to 8.2
Prioritized problem	Lack of awareness on high yielding varieties released by various institution . Low yield and susceptible to pest and diseases in existing non descript varieties <i>Amaranthus viridis L.</i>
Title of the OFT	Assessment of high yielding Amaranthus varieties
Technology options	

TO-1	PLR 2
Source and year	TNAU and 2024
Description	Rich in β carotenoids (8 mg / 100g), White stemmed, highly branched, Suitable for patio or container cultivation in Homesteads, Moderately susceptible to Leaf spot.
Potential yield/income	Yield: 43 t/ha (13%> over CO 1),
Critical Inputs	1. Seeds- PLR 2 – 100g 2. IIHR vegetable special- 1 kg 3 . VAM- 1 Kg
Source of Inputs	TNAU
Photos	
TO-2	Arka Suguna
Source and year	IIHR - 2020
Description	A pure line selection from an exotic collection from Taiwan (IIHR 13560) Light green, succulent stem and broad leaves. First harvest in 25-30 days after sowing and 5-6 cuts in 90 days. Moderately resistant to white rust under field conditions,
Potential yield/income	Yield 25-30 t/ha.
Critical inputs & quantity and cost	1. Seeds- Arka Suguna – 100g 2. IIHR vegetable special- 1 kg 3 . VAM- 1 Kg
Source of Inputs	IIHR
Photos	
Farmers Practice	Local cultivar
Farmers yield	Potential yield of 15 t/ha
Season	Rabi 2025

Cost per replication (Rs.)	Rs.1000/-
No. of replications	5
Total cost for the OFT	Rs.5000.00
Parameters to be studied	1. Germination(%) 2.No. of Harvest 3. Powdery mildew incidence
Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK-Main
Team members	SMS (Horticulture)

OFT No.	07
Status	New proposal
Subject,	Horticulture
Theme	Varietal evaluation
Category	Vegetables
Crop/ enterprise	Coriander
Farming situation	Western zone, Red soil, Rain fall of 685 mm & PH ranges between 7.6 to 8.2
Prioritized problem	Wilt, Powdery mildew and stem gall leads low yield
Title of the OFT	Assessment of high yielding Coriander variety CO - 5
Technology options	
TO-1	Coriander variety CO-5
Source and year	TNAU and 2022
Description	• Duration is 35-40 days for green leaf harvest. • Linalool content is higher than CO(CR)4.
Potential yield/income	herbage yield – 4.7t/ha
Critical Inputs	1. Seeds - Co-5 – 1 kg 2. VAM- 1 kg 3. IIHR vegetable special – 1 kg
Source of Inputs	TNAU
Photos	

TO-2	Coriander variety Suruchi
Source and year	Dr.YSRHU, Hyderabad and 2017
Description	- Plants are herbaceous with lush green leaves. - It has very good aroma - harvesting – 35-55 days.
Potential yield/income	herb yield 4.5t/ha
Critical inputs & quantity and cost	1. Seeds - Suruchi – 1 kg 2. VAM- 1 kg 3. IIHR vegetable special – 1 kg
Source of Inputs	Dr.YSRHU, Hyderabad
Photos	
Farmers Practice	Delight
Farmers yield	Potential yield of 3 t/ha
Season	Rabi 2025
Cost per replication (Rs.)	Rs. 1400/-
No. of replications	5
Total cost for the OFT	Rs.7000.00
Parameters to be studied	1.Powdery mildew incidence 2. Wilt incidence
Parameters to be reported	Yield (Q/ha) and BC Ratio
Source of funding (KVK- Main/TSP/ /SC SP/ Project/Others (specify)	KVK- Main
Team members	SMS (Horticulture)

OFT No.	08
Status	New proposal
Subject,	Soil Science
Theme	Crop production and Management
Category	Oil seeds
Crop/ enterprise	Groundnut
Farming situation	Limited Irrigation, Red loamy Soil, Rain fall of 615 mm & PH ranges -7.8 to 8.2
Prioritized problem	Groundnut is cultivated in an area of 420 ha in Annur block under Limited irrigation condition in kharif season. The major problems are poor nutrient management, micronutrient deficiency and poor yield
Title of the OFT	Assessing the performance of different sources of gypsum on groundnut
Technology options	
TO-1	STFR with Gypsum application
Source and year	TNAU -2020
Description	STFR , Application of FYM 12.5 t/ha + 10:10:45 kg NPK/ha as basal + Application of 12.5 kg/ha of micronutrient mixture + Gypsum 400 kg/ha at 45th day after sowing.
Potential yield/income	2200 Kg/Ha , Rs.1,28,000/-
Critical inputs & quantity and cost	Gypsum – 400 Kg Micronutrient - 10 Kg Total – 6000/-
Source of Inputs	TNAU, Coimbatore
Photos	
TO-2	STFR with IISR Bacto gypsum
Source and year	TNAU 2023
Description	STFR, Application of FYM 12.5 t/ha + 10:10:45 kg NPK/ha as basal + Application of 12.5 kg/ha of micronutrient mixture + Bacto Gypsum
Potential yield/income	2200 Kg/Ha , Rs.1,28,000/-

Critical inputs & quantity and cost	Bacto gypsum – 200 Kg MN mixture – 10 Kg Total –14000/-
Source of Inputs	TNAU ,Coimbatore
Photos	
Farmers Practice	Soil application of macro nutrients alone
Farmers yield	1650 Kg /Ha
Season	Kharif ,2025
Cost per replication (Rs.)	2750/-
No. of replications	5
Total cost for the OFT	Rs. 20,000/-
Parameters to be studied	No of pods per plant, Pod yield and BC ratio
Parameters to be reported	No of pods per plant, Pod yield and BC ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS Soil Science

OFT No.	9
Status	New proposal
Subject,	Soil Science
Theme	Crop production and Management
Category	Pulses
Crop/ enterprise	Greengram
Farming situation	Rainfed, Red loamy Soil, Rain fall of 650 mm & PH ranges -8.1 to 8.5

Prioritized problem	Greengram is cultivated in an area of 224Ha in S.S.Kulam & P.N.Palayam block under rainfed condition in Rabi season. The major problems are poor nutrient management and poor yield,	
Title of the OFT	Assessing the performance of different growth promoters in greengram	
Technology options		
TO-1	Soil test based fertilizer recommendation + Foliar spray of pulse wonder at flowering stage and another at 15 days interval	
Source and year	TNAU, 2020	
Description	STFR + Foliar spray of pulse wonder at flowering stage and another at 15 days interval	
Potential yield/income	8.5 q/ Ha, 62,000/-	
Critical inputs & quantity and cost	Seeds, Pulse wonder	
Source of Inputs	TNAU, Coimbatore	
Photos		
TO-2	Soil test based fertilizer recommendation + Foliar application of TNAU Bio Meenmix at flowering stage and another at 15 days interval	
Source and year	TNAU, 2023	
Description	• Soil test based fertilizer application, Foliar application of TNAU Bio Meenmix at flowering stage and another at 15 days interval	
Potential yield/income	8.5 q/ Ha, 62,000/-	
Critical inputs & quantity and cost	Seeds, TNAU Bio Meenmix	
	Total - Rs. 7250/-	
Photos		
Farmers Practice	Soil application of macro nutrients alone	

Farmers yield	5.2 q/ Ha, 48,000/-
Season	Rabi, 2025
Cost per replication (Rs.)	2550/-
No. of replications	5
Total cost for the OFT	12750/-
Parameters to be studied	No of seeds/ plant, yield / plant, Yield /ha and BC ratio
Parameters to be reported	Yield /ha and BC ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main

OFT No.	11
Status (New proposal/2 nd year /3 rd year)	New proposal
Subject,	Animal Science
Theme	Performance evaluation
Category (if applicable)	Disease management
Crop/ enterprise	Small Ruminants
Farming situation	-
Prioritized problem (short)	Increased expenditure for veterinary interventions and drugs
Title of the OFT	Assessment of Wound Healer in Goat
Technology options	
TO-1	Nano Heal Cream
Source and year	TRPVB, 2021
Description (short)	It is an anti-microbial wound healing cream for animals
Potential yield/income	-
Critical Inputs	Nano Heal Cream
Photos	
TO-2	Healex-FR
Source and year	CIRG, 2015
Description (short)	Healex Spray helps to treat and prevent minor skin infection. It is also used to treat minor burns and to prevent infection in cuts, insect bites, wounds. Applying Healex Plus Spray can give you temporary relief from pain associated with the above conditions
Potential yield/income	-
Critical inputs	Healex-FR

Photos	
Farmers Practice	Turmeric Powder & Neem Oil
Farmers yield	-
Season	-
Cost per replication	Rs 3000
No. of replications	5
Total cost for the OFT	Rs.15000
Parameters to be studied	Body weight Gain, Wound Healing Time (in Days),
Parameters to be reported	Body weight Gain, Wound Healing Time (in Days), BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	SCSP
Team members	SMS Animal Science

9. Frontline Demonstrations proposed during 2025-26

9.1. Summary of FLDs

S. No	Category/ Crop or enterprise	Title	Prioritized problem	Technology	Source of Technology	Status	No. of Demo (replications)	Area (ha)/ units	Total cost involved (Rs.)	Team members involved	No. of demos targeted in DFI village (s)	No. of demos targeted under SC-SP
1	Paddy	Demonstration of paddy variety Co 58	Majority of area is canal irrigation. Majority of the farmers are cultivating the variety Co 43 which is susceptible to water stress, pest and disease incidence.	1.Demonstration of paddy seed Co 58 2.Demonstration of Bacillu subtilis for seed treatment 3.Demonstration of Zn So4 application 4.Demostration of Tricho carts for leaf folder and stem borer management.	TNAU, 2022	New	10	4	17,000	SMS Agronomy & SS&H	0	10
2.	Maize	Demonstration of paddy variety Co H(M) 11	Low yield ,pest and disease incidence and drought	1. Demonstration of maize hybrid seed COH(M) 11 2.Demonstration oof TNAU Maize maxim as foliar spray.	TNAU 2023	New	10	4	24000	SMS Agronomy	0	0
3	Finger Millet	Demonstration of foliar application of Panchakavya in finger millet	Farmers are cultivating local cultivar with conventional method of	TNAU Panchakavya	TNAU, 2021	New	10	4	11000	SMS Agronomy	1	10

			cultivations leads low yield.									
4	Cotton	Demonstration and management practices of boll rot in cotton	Boll rot incidence was higher in high density planting system and it also reduces the yield.	Carbendazim 50 % WP Propiconazole 25 % EC	CICR, 2022	New	10	4	20,000	SMS Agronomy	1	10
5	Cotton	Assess the performance of IPM practices of pink bollworm in cotton	Pink bollworm incidence was higher in rainfed condition	NEEM oil Trichogramma bacteriae Profenophos	TNAU CPG 2020	New	10	4	30,000	SMS Agronomy	0	10
6	Ash gourd	Demonstration of Ash gourd variety PLR- 1 for higher yield	Low yield ,pest and disease incidence	1.Demonstration of High yielding varieties PLR-1 2.Foliar spray of IIHR micronutrient 3. Demonstration of Fruit fly trap	TNAU 2025	Direct FLD	10	4	9000	SMS Horticulture	10	0
7	Ridge gourd	Demonstration of Ridge gourd variety Arka Prasan for higher yield	Low yield ,pest and disease incidence	1.Demonstration of High yielding variety Arka Prasan 2.Foliar spray of IIHR micronutrient 3. Demonstration of Fruit fly trap	IIHR 2020	OFT converted to FLD	10	4	15000	SMS Horticulture	0	0

8	Brinjal	Demonstration of Brinjal variety VRM (Br) 2 for higher yield	Low yield ,pest and disease incidence	1.Demonstration of High yielding varieties VRM (Br) 2 2.Foliar spray of IIHR micronutrient 3.Demonstration of <u><i>T. chilonis</i> & <i>Bacillus thuringiensis</i></u>	TNAU 2021	OFT converted to FLD	10	4	16000	SMS Horticulture	0	10
9	Turmeric	Demonstration of Turmeric Variety IISR – Prathibha for higher yield	Low yield ,pest and disease incidence	1.Demonstration of High yielding varieties IISR – Prathibha 2. Soil application of VAM for drought management 3.Foliar spray of IISR micronutrient	TNAU 2019	OFT converted to FLD	10	4	30000	SMS Horticulture	0	0
10	Vegetable cowpea	ICM in Vegetable cowpea	Low yield due to nutrition deficiency, Lack of awareness about biofertilizers and bio agents, Yield loss due to sucking pest incidences	1. Soil test based fertilizer recommendation 2. Soil application of bio fertilizers (1kg / ac) and bio agents (1kg / ac) 3. Foliar spraying of IIHR special vegetable special @ 5 g/ l at 15 days interval.	TNAU, Coimbatore , 2017	New	10	4	18,000	SMS Soil Science	0	0

				4. Soil application of micronutrients (10kg / ac) 5. Need based pest and disease Management								
11	Bottle gourd	ICM in Bottle gourd	Low yield due to nutrition deficiency, Lack of awareness about biofertilizers and bio agents, Yield loss due to sucking pest incidences	1. Soil test based fertilizer recommendation 2. Soil application of bio fertilizers (1kg / ac) and bio agents (1kg / ac) 3. Soil application of microutrients (10kg / ac) 4. Foliar spraying of IIHR special vegetable special @ 5 g/ l at 15 days interval. 5.Erection of yellow sticky and pheromone traps 6.Need based pest and disease Management	TNAU, Coimbatore , 2017	New	10	4	22800	SMS Soil Science	0	0
12	Farm waste recycling	Demonstration of composting technology using bio mineralizer	Unaware of composting technologies	1.Decomposition using bio mineralizer	TNAU, Coimbatore , 2021	New	10	4	5000	SMS Soil Science	0	0

13	Farm Mechanization	Demonstration of Pneumatic seed driller in HDPS Cotton	Labour scarcity in peak season	Demonstration of Pneumatic seed driller	CIAE 2020	New	10	4	32000	SMS Agri.Engg & Agronomy	10	0
14	Farm Mechanization	Demonstration of Tractor operated raised bed former cum onion bulb planter for small onion	Labour scarcity in peak season	Demonstration of Tractor operated raised bed former cum onion bulb planter	CIAE 2022	New	10	4	16400	SMS Agri.Engg & Agronomy	10	0
15	Poultry	Introduction and Demonstration of TANUVAS Aseel	Rearing of only desi birds	-TANUVAS Aseel chicken is a low input technology best suited for commercial, rearing, small medium farmers etc.	TANUVAS, 2021	New	10	20	20000	SMS Animal Science	0	0
16	Dairy cattle	Demonstration of mixed fodder bank	-Lack of awareness on mixed fodder production at limited area	Demonstration of mixed fodder bank	TANUVAS, 2016	New	10	10	20000	SMS Animal Science	0	10
17	Dairy cattle	Demonstration of TANUVAS – Area specific mineral mixture on production performance of Cow	Lack of awareness about mineral mixture	Demonstration of TANUVAS – Area specific mineral mixture	TANUVAS 2018	2 nd year	10	10	5000	SMS Animal Science	0	0

18	Vegetables	Demonstration of Nutri Garden	Lack of knowledge about Nutri Garden	Demonstration of Nutri Garden	TNAU 2012	3 rd year	10	-	20000	SMS Home Science	0	0
19	Milk	Demonstration of Milk based value-added products (FLD through EDP mode)	Poor market infrastructure and fluctuated market price Involvement of middleman in marketing	Value addition, Product developments Branding and, Labeling	CSCRI TNAU 2018	2 nd year	10	-	20000	SMS Home Science	0	0
20	Banana	Promoting income generation of banana farmers through commercial production of banana products (FLD through EDP mode)	Lack of Knowledge about Value addition	Value addition, Product developments Branding and, Labeling	CSCRI TNAU 2021	New	10	-	30000	SMS Home Science	0	0
21	Poultry	Introducing Namakkal chick1 under SC/SP Programme	Rearing of only desi birds	-TANUVAS Namakkal 1chicken is a low input technology best suited for commercial, rearing, small medium farmers etc.	TANU VAS, 2018	New	10	20	20000	SMS Home Science & Animal Science	0	10
						Total	210	116	401200	-	42	70

9.2. Details of FLDs (Use one table per FLD) (TECHNOLOGY WRITEUP) 2025-26

Furnish existing/continuing FLDs first followed by newly proposed FLDs

FLD No.:	01
Status (New proposal/2 nd year /3 rd year)	New
Subject	Agronomy
Category:	Varietal Demonstration and Popularization
Crop/ enterprise:	Cereals – Paddy
Farming situation	Canal irrigated, upland, clay loam
Prioritized problem:	Paddy is cultivated in about 872 ha of land in the district in which about 870 ha is canal irrigation. Majority of the farmers are cultivating the variety Co 43 which is susceptible to water stress, pest and disease incidence.
Title	Demonstration of Paddy variety Co 58
Technology to be demonstrated:	Seed – Co 58
Hybrid or Variety:	Variety
Source of Technology:	TNAU ,Coimbatore (2022)
Description	Duration – 120 – 125 days, Season – <i>Kuruvai</i> , White long slender and aromatic variety of head rice recovery (65.0%) and resistant to lodging
Potential yield	58.5q /ha
Critical input, quantity and cost	Paddy seed, <i>Bacillus subtilis</i> , ZnSo ₄ and <i>Tricho cards</i>
Farmers practice	Co 43
Source of input	TNAU, Coimbatore
Photos	
Average farmers yield	58.5 q/ha
Season	<i>Kharif</i> 2025

No. of Demos (replications)	10
Total cost for the Demo	Rs.17,000.00
Parameters to be studied:	No of plants / sq.m, No of productive tillers / plant.
Parameters to be reported	Grain yield (kg/ha)and BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	SCSP
Team members	SMS (Agronomy)

FLD No.:2	Demonstration of TNAU Maize Hybrid COH (M) 11 for yield and income potential
Hybrid or Variety:	Hybrid
Subject	Agronomy
Category:	Hybrid Demonstration
Crop/ enterprise:	Cereals – Maize
Farming situation	Irrigated, Red loam soil
Prioritized problem:	Maize is cultivated in about 975 ha of land in the Block in which about 870 ha is canal irrigation. Majority of the farmers are cultivating the private hybrids which is susceptible to pest and disease incidence.
Title	Demonstration of Maize Hybrid CoH(M) 11
Technology to be demonstrated:	Seed – CoH(M) 11, Seed treatment and IPM
Hybrid or Variety:	Hybrid
Source of Technology:	TNAU ,Coimbatore (2023)
Description	Duration : 105 – 110 days, Season –Adi, Purataasi,Thai pattam, Yield -81q/ha(Irrigated), 65.9 q/ha (Rain fed), Drought tolerance, Better fodder quality and Moderately resistance to Fall Army Worm
Potential yield	81q / ha
Critical input, quantity and cost	Seed and Maize crop booster
Farmers practice	Private hybrid
Source of input	TNAU, Coimbatore.

Photos	
Average farmers yield	65.9 q/ha
Season	Rabi 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.24,000.00
Parameters to be studied:	Grain yield (q/ha), Cob weight (g), Fodder yield (q/ha),
Parameters to be reported	Grain yield (q/ha) and BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS (Agronomy)

FLD No.:3	Demonstration of Foliar application of Panchakavya in Finger Millet
Status (New proposal/2 nd year /3 rd year)	OFT converted to FLD
Subject	Agronomy
Category:	Millets
Crop/ enterprise:	Finger millet
Farming situation	Rainfed, Red sandy soil
Prioritized problem:	Finger millet is the important Millet crop cultivated over 560 ha in Coimbatore district. 80 percent of the area comes under rainfed conditions and the farmers are adopting old varieties with conventional method of cultivations.

Title	Demonstration of Foilar application of Panchakavya in Finger Millet
Technology to be demonstrated:	Co 15
Hybrid or Variety:	Variety
Source of Technology:	TNAU, 2021
Description	Foliar application – 3% spray, Spray volume : 200 litre per acre. Time of spray : 25 th and 30 th days after sowing
Potential yield	Grain -24.4 qtl / ha and Fodder – 64.9q/Ha
Critical input, quantity and cost	TNAU Panchakavya
Farmers practice	Conventional method of cultivation with old variety Hill ragi
Source of input	TNAU
Photos	
Average farmers yield	Grain yield - 14.40q/ha and Fodder – 35.5 q/Ha
Season	<i>Kharif</i> 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.11,000.00
Parameters to be studied:	Plant height(Cm), Number of productive tiller/ plant, Grain Yield (q / ha), Fodder yield (Q / ha)
Parameters to be reported	Yield(q/ha) and BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS (Agronomy)

FLD No: 4	Demonstration of management practices of boll rot in cotton
Status (New proposal/2 nd year /3 rd year)	New
Subject	Agronomy

Category:	Fiber crop
Crop/ enterprise:	Cotton
Farming situation	Rainfed
Prioritized problem:	Cotton is being cultivated as commercial crop around 65 ha. In cotton high density planting system boll rot incidence was higher and it reduces the yield upto 40 %
Title	Demonstration of management practices of boll rot in cotton,
Technology to be demonstrated:	Cotton CICR variety
Hybrid or Variety:	Variety
Source of Technology:	ICAR CICR 2022
Description	Mostly cotton cultivated in rainfed condition, and boll rot incidence was higher and it reduces the yield
Potential yield	17 q / ha
Critical input, quantity and cost	Carbendazim 50 % WP 2gm and Propiconazole 25 % EC 1ml/ litre
Farmers practice	-
Source of input	-
Photos	
Average farmers yield	15 q / ha
Season	Rabi 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.20, 000
Parameters to be studied:	Reduction of boll rot incidence percentage: Yield and BCR
Parameters to be reported	Yield(q/ha) and BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS (Agronomy)

FLD No: 5	Assess the performance of IPM practices for pink bollworm in cotton
Status (New proposal/2 nd year /3 rd year)	New
Subject	Agronomy
Category:	Fiber crop
Crop/ enterprise:	Cotton
Farming situation	Rainfed, Red sandy loam and clay loam soil condition
Prioritized problem:	Cotton is being cultivated as commercial crop around 1200 ha. .
Title	Assess the performance of IPM practices for pink bollworm in cotton
Technology to be demonstrated:	Use pheromone trap to monitor the adult moth activity @ 5 / acre Spraying any one of the insecticides viz., Emamectin benzoate 5% SG 76 -88 g/ acre or Diflubenzuron 25 % WP 120 -140 g /acre or Chlorantraniliprole 18.5 % SC 60 ml / acre
Hybrid or Variety:	Variety
Source of Technology:	TNAU CPG 2020
Description	Mostly cotton cultivated in rainfed condition and pink bollworm incidence was higher and it reduces the yield upto 35 %
Potential yield	15q / ha
Critical input, quantity and cost	Neem oil, <i>Trichogramma bactriae</i> , Profenophos
Farmers practice	-
Source of input	-
Photos	
Average farmers yield	13.5 q / ha
Season	Rabi 2025
No. of Demos (replications)	10

Total cost for the Demo	Rs.30, 000
Parameters to be studied:	Pest infestation percentage: Yield and BCR
Parameters to be reported	Yield(q/ha) and BCR
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main
Team members	SMS (Agronomy)

FLD No	06
Status	Direct FLD
Subject	Horticulture
Category:	Vegetables
Crop/ enterprise:	Ash gourd
Farming situation	Western zone, Red soil, Rain fall of 685 mm & PH ranges between 7.1 to 8.4
Prioritized problem:	Nutrient deficiency, Poor Soil amendments, Pest & disease incidences leads low yield.
Title	Demonstration of Ash gourd variety PLR-1 for higher yield
Technology to be demonstrated:	1.Demonstration of High yielding varieties PLR-1 2.Foliar spray of IIHR micronutrient 3. Demonstration of Fruit fly trap
Hybrid or Variety:	Variety : PLR-1
Source of Technology:	TNAU 2025
Description	Small size fruits (350g), less seed, more flesh
Potential yield	32 t/ha
Critical input, quantity and cost	1. PLR-1 seeds - 2kgs , 2. IIHR Vegetable special – 20 kgs 3. Fruit fly trap - 10 nos
Farmers practice	Cultivating local variety (Priya) with indiscriminate use of fertilizer and pesticides
Source of input	TNAU
Photos	

Average farmers yield	18-20 t /ha
Season	Rabi 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.9000/-
Parameters to be studied:	1. No. of pickings 2. Mosaic incidence/m ²
Parameters to be reported	Yield (Q/Ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK-Main
Team members	SMS (Horticulture)

FLD No	07
Status	OFT convert to FLD
Subject	Horticulture
Category:	Vegetables
Crop/ enterprise:	Ridge Gourds
Farming situation	Western zone, Red soil, Rain fall of 645 mm & PH ranges between 7.4 to 8.5
Prioritized problem:	Low yield ,pest and disease incidence
Title	Demonstration of Ridge gourd variety Arka Prasan for higher yield
Technology to be demonstrated:	1.Demonstration of High yielding variety Arka Prasan 2.Foliar spray of IIHR micronutrient 3. Demonstration of Fruit fly trap
Hybrid or Variety:	Variety : Arka Prasan
Source of Technology:	IIHR 2020
Description	Early variety (42-45 days for first picking). Duration : 120-135 days. long size fruits.
Potential yield	26 t/ha
Critical input, quantity and cost	1 Arka Prasan Seeds - 3 kgs , 2. IIHR Vegetable special – 20 kgs 3. Fruit fly trap - 10 nos
Farmers practice	Local variety (Rehka) with Indiscriminate use of fertilizer and pesticides
Source of input	IIHR

Photos	 
Average farmers yield	15-17 t /ha
Season	Kharif 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.15 000/-
Parameters to be studied:	1.No. of pickings 2. Leaf spot incidence/m ² 3. No. of fruit fly attacks/m ²
Parameters to be reported	Yield (Q/Ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	SCSP

FLD No	08
Status	New proposal
Subject	Horticulture
Category:	Vegetables
Crop/ enterprise:	Brinjal
Farming situation	Western zone, Red soil, Rain fall of 685 mm & PH ranges between 7.1 to 8.4
Prioritized problem:	Low yield ,pest and disease incidence
Title	Demonstration of Brinjal variety VRM (Br) 2 for higher yield
Technology to be demonstrated:	1.Demonstration of High yielding varieties VRM (Br) 2 2.Foliar spray of IIHR micronutrient 3.Demonstration of <i>T. chilonis</i> & <i>Bacillus thuringiensis</i>
Hybrid or Variety:	Variety : VRM (Br) 2
Source of Technology:	TNAU 2021
Description	Fruits are Oval, deep purple color fruits, Duration :150 days Spineless characteristic makes amenable for long transportation.

Potential yield	52.5 t /ha
Critical input, quantity and cost	1. VRM (Br) 2 Seeds- (CO-6)- 500 g 2. Vegetable special - 10 kgs 3. <i>Bacillus thuringiensis</i> - 2 lits
Farmers practice	Indiscriminate use of fertilizer and pesticides
Source of input	TNAU
Photos	  
Average farmers yield	8 t /ha
Season	Rabi 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.16000/-
Parameters to be studied:	1. No. of pickings 2. Dry rot incidence/m ² 3. No. of shoot & fruit borer attacks/m ²
Parameters to be reported	Yield (Q/Ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	SCSP

FLD No	09
Status	New proposal
Subject	Horticulture
Category:	Spices
Crop/ enterprise:	Turmeric
Farming situation	Western zone, Red soil, Rain fall of 685 mm & PH ranges between 7.1 to 8.4
Prioritized problem:	Low yield ,pest and disease incidence
Title	Demonstration of Turmeric Variety IISR – Prathibha for higher yield

Technology to be demonstrated:	1.Demonstration of High yielding varieties IISR – Prathibha 2. soil application of VAM for drought management 3.Foliar spray of IISR micronutrient
Hybrid or Variety:	Variety : IISR – Prathibha
Source of Technology:	TNAU 2019
Description	Prathibha turmeric stimulates immunity. Relatively higher levels of curcumin (6.25%), oleoresin (16.2%) and essential oil (6.2%) make Prathibha a hottest choice for Culinary and medicinal purposes.
Potential yield	58.7 t /ha
Critical input, quantity and cost	1. Seed Rhizome – Prathibha- 500 kgs, 2. IISR micronutrient - 20 Kgs, 3. VAM 20- kgs 4. <i>Pseudomonas</i> - 10 lits
Farmers practice	Local variety with Indiscriminate use of fertilizer and pesticides
Source of input	IISR
Photos	
Average farmers yield	30-35 t /ha
Season	Kharif 2025
No. of Demos (replications)	10
Total cost for the Demo	Rs.30000/-
Parameters to be studied:	1.No. of shoot borer attacks/m ² 2. Leaf spot incidence/m ²
Parameters to be reported	Yield (Q/Ha) and BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK-Main

FLD No	10
Status	New proposal

Subject	Soil Science
Category:	Vegetables
Crop/ enterprise:	Vegetable cowpea
Farming situation	Bore well irrigated, Red sandy loam , Rain fall of 715 mm & PH ranges between 7.8 to 8.5
Prioritized problem:	Vegetable cowpea is one of the most important vegetable crop grown in Coimbatore district. Major problems are Low yield due to nutrition deficiency, Lack of awareness about biofertilizers , bio agents and micronutrients, Yield loss due to pest and diseases.
Title	Demonstration of Integrated crop management practices in Vegetable cowpea
Technology to be demonstrated:	❖ Soil test based fertilizer recommendation ❖ Soil application of bio fertilizers ❖ Soil application of micronutrients ❖ Foliar spraying of IIHR special vegetable special Need based pest and disease Management
Hybrid or Variety:	Private hybrid
Source of Technology:	TNAU,2020
Description	❖ Soil test based fertilizer application provides adequate knowledge about the soil fertility status, soil application of biofertilizers and bioagents enhances the nutrient uptake and prevents soil borne pathogens. Soil and Foliar application of micronutrients ensures the yield and quality.
Potential yield	16 T/Ha
Critical input, quantity and cost	<i>Azospirillum</i> 10 kg – 1000/-, <i>Phosphobacteria</i> – 10 kg -1000/- , <i>T.Viride</i> 10 kg – 2000/- , <i>Bacillus subtilis</i> 10 kg – 2000/- ,TNAU MN Mixture -50 kg – 5000/-, IIHR Micronutrient 20 kg -5000/- Sticky traps – 60 Nos – 2000.00
Farmers practice	No application of biofertilizers and bio agents
Source of input	KVK, TNAU
Photos	

Average farmers yield	16 T/Ha
Season	Kharif 2025
No. of Demos (replications)	10
Total cost for the Demo	18000.00
Parameters to be studied:	No of pickings, Yield (q/ha) sucking pest / m ² , BC Ratio
Parameters to be reported	Yield, BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK- Main
Team members	SMS Soil Science

FLD No.:	11
Status (New proposal/2 nd year /3 rd year)	New proposal
Subject	Soil Science
Category:	Vegetables
Crop/ enterprise:	Bottle gourd
Farming situation	Bore well irrigated, Red soil, Rain fall of 645 mm & PH ranges between 7.9 to 8.3
Prioritized problem:	Bottle gourd is one of the most important pandal vegetable crop grown in Coimbatore district. Major problems are Low yield due to nutrition deficiency, Lack of awareness about bio fertilizers and bio agents, Yield loss due sucking pests and root rot incidences.
Title	Demonstration of Integrated crop management practices in Bottle gourd
Technology to be demonstrated:	❖ Soil test based fertilizer recommendation ❖ Soil application of bio fertilizers and bio agents ❖ Soil application of micronutrients ❖ Foliar spraying of IIHR special vegetable special ❖ Erection of yellow sticky and pheromone traps ❖ Need based pest and disease Management
Hybrid or Variety:	Private hybrid
Source of Technology:	TNAU,2020
Description	Soil test based fertilizer application provides adequate knowledge about the soil fertility status, soil application of bio fertilizers and bio agents enhances the nutrient uptake and prevents soil borne pathogens. Soil and Foliar application of micronutrients ensures the bulb yield and quality.

Potential yield	42 T/ Ha
Critical input, quantity and cost	<i>Azospirillum</i> -10 kg -1000/- , <i>Phosphobacteria</i> – 10 kg – 1000/-, <i>T.Viride</i> – 10 kg – 2000/- <i>Bacillus</i> – 10 kg – 2000/- TNAU MN Mixture – 50 kg – 5000/-, IIHR Micronutrient mixture 20 kg – 5000/-, Sticky and pheromone traps 50 nos – 6800/-
Farmers practice	No application of bio fertilizers and bio agents
Source of input	KVK, TNAU
Photos	   
Average farmers yield	36t/Ha
Season	Rabi 2025
No. of Demos (replications)	10
Total cost for the Demo	22,800/-
Parameters to be studied:	Fruit weight, No of fruits /pt, No of pickings, sucking pest infestation /m, yield /ha, and BC ratio
Parameters to be reported	Yield, BC Ratio
Source of funding (KVK-Main/TSP/ /SC SP/ Project/Others (specify)	KVK Main

FLD No.	18
Status (New proposal/2 nd year /3 rd year)	3 rd year
Subject	Home Science
Category:	Nutritional security
Crop/ enterprise:	Vegetables, Leafy vegetables & Fruits
Farming situation	NA
Prioritized problem:	Malnutrition among women of reproductive age increases the risk of mortality during labor and delivery which further leads to their newly born children at risk of long-term deficiencies. Improving nutritional status, including micronutrient status, can lead to increased productivity, increases child survival and growth. This reduces mental morbidity and mortality. To overcome this problem, Kitchen Garden is considered to be the best possible solution

Title	Demonstration of Nutri-garden		
Technology to be demonstrated:	1.Layout of Nutrition Garden 2.Nursery raising 3.Soil application of bio fertilizer 4.Foiliar application of vegetable spray and neem soap)		
Hybrid or Variety:	Variety		
Source of Technology:	TNAU 2012		
Description	Food and nutritional security is the key areas in developing country need to be addressed should address. For poor households, vegetables and fruits are often the only sources of micronutrients in the family diet. Establishment of Kitchen Garden in rural areas is easy due to availability of space for farm families who are already engaged in agricultural practices. Kitchen gardening is one of the World's most ancient food production practices and is practiced throughout the world. Homestead production of fruits and vegetables provides the households with direct access to important nutrients that may not be readily available or within their economic reach. Vegetables play a crucial role in human's diet and rural generation should get awareness about importance of vegetables (Simple Jain 2017). Hence, kitchen gardening would be a good mean to improve household food security.		
Potential yield	NA		
Critical input, quantity and cost	Vegetables seeds, seedlings & tools& Rs.1500 per demonstration

Category:	Value addition
Crop/ enterprise:	Fruits
Farming situation	NA
Prioritized problem:	Unaware of value addition
Title	EDP on Promoting income generation of banana farmers through commercial production of banana products
Technology to be demonstrated:	Value addition, Processing, Labeling and Packing
Hybrid or Variety:	NA
Source of Technology:	CSC&RI TNAU 2021
Description	Banana value addition offers significant opportunities for increasing profits and improving livelihoods in the banana industry, especially for farmers and small-scale businesses. By processing bananas into various products, farmers can reduce post-harvest losses, extend shelf life, and cater to a wider range of consumer preferences. This can lead to higher income, improved economic stability, and greater market access.
Potential yield	NA

Subject	Home Science
Category:	Processing & Value addition
Crop/ enterprise:	Milk
Farming situation	NA
Prioritized problem:	Due to poor market infrastructure and fluctuated market price and involvement of middleman in marketing the milk producers they were not getting remunerative price for their produces.
Title	EDP on Innovative milk products for sustainable and lucrative entrepreneurship
Technology to be demonstrated:	Value addition, Processing, Labeling and Packing
Hybrid or Variety:	NA
Source of Technology:	TANUVAS 2019
Description	.Value-added products derived from milk offer significant opportunities for farmers to increase income and diversify their product offerings. This involves processing milk into products like cheese, yogurt, ghee, and flavored milk, which command higher prices than raw milk. Value-added products can fetch higher prices than raw milk, leading to greater profitability for farmers. Farmers can become more involved in the processing and marketing of their milk, enhancing their income.

Budget	50,000.00

12. Trainings planned during 2025-26

12.1. Trainings for Farmers and Farm Women planned during 2025-26

<i>S.No</i>	<i>Thematic area</i>	<i>Crop / Enterprise</i>	<i>Major problem</i>	<i>Linked field intervention (OFT/ FLD)</i>	<i>Training Course Title</i>	<i>No. of Courses</i>	<i>Expected No. of participants (including SC/ST Farmers)</i>	<i>Names of the team members involved</i>
1	Crop Production	Paddy	Low yield and disease	FLD	Seed treatment with bio agents for enhancing productivity	1	20	SMS Agronomy
2		Paddy	Pest problem	FLD	Integrated pest management	1	17	SMS Agronomy
3		Maize	Low yield	FLD	Integrated crop management	1	18	SMS Agronomy
4		Ragi	Low yield and disease	OFT and FLD	Integrated crop management	2	38	SMS Agronomy
5		Bengalgram	Root rot and pod borer	CFLD and OFT	Seed treatment with bio agents	3	38	SMS Agronomy
6		Cotton	Pest incidence	FLD	IPDM	3	60	SMS Agronomy
7		Ground nut	Nutrition deficiency	OFT,CFLD	Soil amendment in groundnut cultivation	2	60	SMS Agronomy

8	Horticulture	Tomato	Seed borne diseases	OFT	Nursery techniques for quality seedling production	1	15	SMS (Horticulture)
9		Bhendi	Poor seedling growth	OFT	Seed treatment with bio agents for enhancing productivity	1	15	SMS (Horticulture)
10		Coriander	Weed infestation	OFT	Integrated weed management	1	15	SMS (Horticulture)
11		Amaranthus	Poor seedling growth	OFT	Seed treatment with bio agents for enhancing productivity	1	15	SMS (Horticulture)
12		Coconut	Immature Nut fallen	FFS	Nutrient management in Coconut production	2	15	SMS (Horticulture)
13		Ridge gourd	Flower drop	FLD	Role of PGR's in ridge gourd cultivation	1	15	SMS (Horticulture)
14		Banana	Weed infestation	-	Importance of intercrops in young Banana cultivation	2	15	SMS (Horticulture)
15		Turmeric	Weed infestation	FLD	Integrated weed management in turmeric	1	15	SMS (Horticulture)
16		Brinjal	Poor seedling growth	FLD	Seed treatment with bio agents for enhancing productivity	1	15	SMS (Horticulture)
17		Ash gourd	Seed borne diseases	FLD	Seed treatment with bio agents for enhancing productivity	1	15	SMS (Horticulture)
16	Soil Health and Fertility Management	Vegetable cowpea	Indiscriminate use of fertilizers	FLD	Soil test based fertilizer recommendation in Vegetable cowpea	1	15	SMS (Soil Science)

17		Vegetable cowpea	Unaware of micro nutrients	FLD	Integrated nutrient management in Vegetable cowpea	1	15	SMS (Soil Science)
18		Bottle gourd	Indiscriminate use of fertilizers	FLD	Soil test based fertilizer recommendation in Bottle gourd	1	15	SMS (Soil Science)
19		Bottle gourd	Unaware of micro nutrients	FLD	Integrated nutrient management in Bottle gourd	1	15	SMS (Soil Science)
20		Greengram	Indiscriminate use of fertilizers	OFT	Soil Test Based Fertilizer Recommendation In Greengram	1	15	SMS (Soil Science)
21		Groundnut	Unaware of micro nutrients	OFT	Integrated nutrient management In Groundnut	1	15	SMS (Soil Science)
22		Greengram	Unaware of micro nutrients	OFT	Role And Importance Of Micronutrients In Greengram	1	15	SMS (Soil Science)
23		Groundnut	Unaware of micro nutrients	OFT	Integrated nutrient management In Groundnut i	1	15	SMS (Soil Science)
24		All crops	Unaware of waste recycling	FLD	Farm waste recycling	2	30	SMS (Soil Science)
25		All crops	Unaware of soil testing	FLD and OFT	Soil and water testing	4	60	SMS (Soil Science)
26	Livestock Production and Management	Goat	Decreased production performance	OFT	Profitable goat farming	2	30	SMS Animal Science
27		Dairy	Unaware of improved fodder variety	-	Clean milk production	2	30	SMS Animal Science

28		Poultry	Lack of knowledge about income via poultry	FLD	Poultry farming	1	15	SMS Animal Science
29	Home Science/Women empowerment	Millets	Lack of knowledge about value addition		Value added products from millets	2	30	SMS (Home Science)
31		Nutrition garden	Nutritional security	FLD	Nutrition garden establishment and management	2	30	SMS (Home Science)
32		Banana	Lack of knowledge about value addition	EDP	Value added products from Banana	2	20	SMS (Home Science)
33		Storage	Improper storage methods		Safety storage methods	2	20	SMS (Home Science)
34		Beekeeping	Lack of knowledge about income generation activity		Income generation through bee keeping	2	30	SMS (Home Science)
35		Fruits and Vegetables	Post-harvest loss	-	Value added products from fruits and vegetables	3	30	SMS (Home Science)
36		Milk	Lack of knowledge about value addition	EDP	Value added products from Milk	2	20	SMS (Home Science)
37		Areca plate making	Lack of knowledge about income generation activity		Income generation through agricultural allied enterprises	2	20	SMS (Home Science)
38		Mushroom	Lack of knowledge about value addition		Value added products from mushroom	2	20	SMS (Home Science)

39		Coconut	Lack of knowledge about value addition		Value added products from	3	30	SMS (Home Science)
40	Agril. Engineering	Small Onion	Labour scarcity Cost of operation is high	FLD	Demonstration of Tractor operated raised bed former cum onion bulb planter for small onion	1	15	SMS (Agri.Engg)
41		Groundnut	Labour scarcity Cost of operation is high		Tractor drawn seed drill in Rain fed Groundnut production	1	15	SMS (Agri.Engg)
42		Paddy	Labour scarcity Cost of operation is high		Mechanized Paddy Hay rake	1	15	SMS (Agri.Engg)
43		Sorghum	Labour scarcity Cost of operation is high		Utilization of Tractor operated harvester in Rain fed sorghum production	1	15	SMS (Agri.Engg)
44		Banana	Labour scarcity for sucker treatment	FLD	Demonstration of Sucker treatment device for Banana	1	15	SMS (Agri.Engg)
45		Bengalgram	Labour scarcity Cost of operation is high.		Mechanization in Bengalgram production	1	15	SMS (Agri.Engg)
46		Cotton	Labour scarcity Cost of operation is high.	FLD	Demonstration of Pneumatic seed driller in HDPS Cotton	1	15	SMS (Agri.Engg)
47		Tomato	Improper water supply		Establishment and maintenance of Drip Irrigation system	1	15	SMS (Agri.Engg)

48		Turmeric	Labour scarcity Cost of operation is high	-	Turmeric Steam boiler	1	15	SMS (Agri.Engg)
49		Coconut	Labour scarcity	-	Coconut tree climber	1	15	SMS (Agri.Engg)
50		All Crops	Poor Rain water practices	-	Rain water Harvesting structures and Techniques	1	15	SMS (Agri.Engg)
	TOTAL					84	1226	

12.2. Trainings for Rural Youth planned during 2025-26

S. No	Thematic area	Crop / Enterprise	Major problem	Linked field intervention (OFT/FLD)	Training Course Title	No. of Courses	Expected No. of participants	Names of the team members involved
1	Nursery Management of Horticulture crops	Vegetables	Poor seedling growth	OFT	Quality seedling production techniques	1	20	SMS Horticulture
2	Rejuvenation of old garden	Coconut	Pest and disease	FLD	Improved crop health management in coconut	1	15	SMS Horticulture
3	Protected cultivation of vegetable crops	Vegetables	Pest and disease	-	Recent production techniques in vegetable cultivation	1	20	SMS Horticulture
4	Commercial fruit production	Banana	Nutrient deficiency , Pest and disease	-	ICM in Banana	2	40	SMS Horticulture
5	Integrated Farming System	IFS	Low income ,Failure of Mono cropping		Integrated Farming System	2	45	SMS Agronomy
6	Integrated Crop Management	Mulberry	Pest and Disease		Mulberry cultivation and silk worm rearing	1	22	SMS Agronomy
7	Production of organic inputs	All crops	Unaware of production of organic inputs	FLD	Production of organic inputs	1	20	SMS Soil Science
8	Vermi-culture	All crops	Unaware of composting technology	FLD	Vermicomposting	1	20	SMS Soil Science
9	Mushroom Production	Mushroom	Lack of knowledge about income generation activities		Mushroom production	1	15	SMS Home Science and Senior Scientist and head

10	Bee-keeping	Bee keeping	Lack of knowledge about scientific method of beekeeping		Scientific beekeeping	2	30	SMS Home Science
11	Value addition	Processing	Post-harvest loss	FLD	Value added products from banana	2	30	SMS Home Science
12	Small scale processing	Value addition	Lack of knowledge about innovative product		Millet value addition	2	30	SMS Home Science
13	Women empowerment	Income generation	Lack of knowledge about income generation activities		Areca plate making	1	5	SMS Home Science
14	Rural Crafts	Rural craft	Lack of knowledge about income generation activities		Income generation activities through banana fiber production	1	15	SMS Home Science
15	Production of quality animal products	Milk	Lack of knowledge about income generation activities	FLD	Value added products from milk	1	15	SMS Home Science
16	Poultry production	Poultry	Lack of knowledge about improved breeds	FLD	Introduction of Namakkal 1 in Coimbatore Dist	1	15	SMS Home Science
17	Dairying	Dairy	Lack of knowledge		Profitable dairy farming	1	15	SMS (Animal Science)

			about profitable dairy farming					
18	Sheep and goat rearing	Sheep and goat	Lack of knowledge about herbo ecoto parasiticide on small ruminants		Scientific method of sheep and goat rearing	1	15	SMS (Animal Science)
19	Quail farming	Quail	Lack of knowledge about alternative income source	Nil	Quail farming	1	15	SMS (Animal Science)
20	Piggery	-	-	-	-	-	-	-
21	Rabbit farming	-	-	-	-	-	-	-
22	Poultry production	Poultry	Lack of knowledge about improved breeds	FLD	Introduction of Assel in Coimbatore Dist	1	15	SMS (Animal Science)
23	Ornamental fisheries	-	-	-	-	-	-	-
24	Composite fish culture	-	-	-	-	-	-	-
25	Freshwater prawn culture	-	-	-	-	-	-	
26	Shrimp farming	-	-	-	-	-	-	--
27	Pearl culture	-	-	-	-	-	-	-
28	Cold water fisheries	-	-	--	-	-	-	-
29	Fish harvest and processing technology	-	-	-	-	-	-	-
30	Fry and fingerling rearing	-	-	-	-	-	-	-
31	Any other (pl. specify)	-	-	-	-	-	-	-
	Total					26	437	

12.3. Trainings for Extension Personnel planned during 2025-26

S. No	Thematic area	Training Course Title	No. of Courses	No. of Participants
1	Productivity enhancement in field crops	Recent technologies in Millet production	2	45
2	Integrated Pest Management	Pest and disease management in groundnut	1	25
3	Integrated crop management	Integrated crop management in Banana	1	20
4	Rejuvenation of old garden	Improved crop health management in Coconut	1	20
5	Protected cultivation technology	Recent production techniques in Vegetable cultivation	1	20
6	Production and use of organic inputs	On farm Production and use of organic inputs	1	20
7	Care and maintenance of farm machinery and implements	Care and maintenance of farm machinery and implements	1	20
8	Gender mainstreaming through SHGs	Income generation activities	2	25
9	Formation and Management of SHGs	Capacity development programme through agri and allied enterprises	2	25
10	Women and Child care	Nutritional security through millets and nutrigarden	2	25
11	Low cost and nutrient efficient diet designing	Importance of millets	2	25
12	Group Dynamics and farmers organization		-	-
13	Information networking among farmers		-	-
14	Capacity building for ICT application		-	-
15	Management in farm animals	Profitable Dairy farming	1	15
16	Livestock feed and fodder production	Feed management	1	15
17	Household food security	Scientific method of storage	1	15
18	Any other (pl. specify)		-	-
	Total		19	325

12.4. Skill trainings and vocational trainings planned during 2025-26

S.No.	Training title	Duration (Days)	No. of programmes	Sponsoring agency	Participants (Nos.)	Name of the team members
1	Importance of integrated terrace garden	4 days	1	Dept .of Horticulture	20	SMS (Horticulture)
2	Integrated Farming System	4 days	1	Dept .of Agriculture	20	SMS (Agronomy)
3	Production and use of organic inputs	3 days	1	Dept of Agriculture	15	SMS Soil Science
4	Value addition in millets	3 days	1	ATMA	20	SMS (Home Science)
5	Value addition in fruits and vegetables	3 days	1	ATMA	20	SMS (Home Science)
6	Profitable dairy farming	3 days	1	ATMA	20	SMS (Animal science)
7	Micro Irrigation	4 days	1	ATMA	20	SMS (Agri.Engg)
	Total		7	-	145	

12.5. Sponsored trainings planned during 2025-26

S.No.	Thematic area and the Crop/Enterprise	Training title	No. of programmes and Duration (days)	Type of Clientele	Expected No. of participants	Sponsoring agency	Names of the team members involved
1	Agriculture	Importance of millet and its cultivation	3	Farmers and farm women	45	State Department of Agriculture	SMS (Agronomy)
2	Agriculture	Quality Seed production	2	Farmers and farm women	30	State Department of Agriculture	SMS (Agronomy)
3	Agriculture	Groundnut production Technology	2	Farmers and farm women	46	State Department of Agriculture	SMS (Agronomy)

4	Agriculture	Farm waste management	2	Farmers and farm women	30	Department of Agriculture, Coimbatore	SMS Soil science
5	Vegetable crops	Improved production technologies in vegetable crops	3	Farmers and farm women	25	State department of Horticulture Coimbatore	SMS (Horticulture)
6	Coconut	Improved production technologies in Coconut	3	Rural youth	20	State department of Horticulture Coimbatore	SMS (Horticulture)
7	Millet	Value added products from agricultural commodities	2	Farmers and farm women	20	State department of Agriculture	SMS (Home Science)
8	Fruits and vegetables	Value added products from fruits and vegetables	2	Farmers and farm women	20	State department of Horticulture	SMS (Home Science)
9	Dairy	Profitable dairy farming	2	Farmers and farm women	20	ATMA	SMS (Animal Science)
10	Dairy	Feed and fodder management	1	Farmers and farm women	20	State department of Animal husbandry	SMS (Animal Science)
	Total		22		276	-	-

13. Extension programmes planned during 2025-26

S. No.	Extension programme	No. of programmes	No. of Participants	Team member involved
1	Advisory Services	100	300	All technical staff
2	Diagnostic visits	60	300	All technical staff
3	Field Day	15	600	All technical staff
4	Group discussions	12	200	All technical staff
5	Kisan Ghosthi	2	300	All technical staff
6	Film Show	6	180	All technical staff
7	Kisan Mela	4	600	All technical staff
8	Exhibition	10	1000	All technical staff
9	Scientists' visit to farmers field	60	600	All technical staff
10	Plant/Soil health/Animal health camps	3	300	All technical staff
11	Ex-trainees Sammelan	2	200	All technical staff
12	Farmers' seminar/workshop	3	150	All technical staff
13	Method Demonstrations	15	300	All technical staff
14	Celebration of important days	3	300	All technical staff
15	Special day celebration	2	200	All technical staff
16	Exposure visits	5	300	All technical staff
17	Technology week	1	100	All technical staff
18	FFS	1	50	All technical staff
19	Farm innovators meet	2	100	All technical staff
20	Awareness programs	5	200	All technical staff
21	Lecture delivered	10	200	All technical staff
22	TV/Radio Programme	3	-	All technical staff
23	News clips	5	-	All technical staff
24	Popular Articles	5	100	All technical staff
25	Research Article	3	150	All technical staff
26	Extension Literatures	6	200	All technical staff
27	Kisan Mobile Advisory Services	24	24000	All technical staff
28	Others (Specify)	5	1000	All technical staff
	Total	372	31930	

14. Activities proposed as Knowledge and Resource Centre during 2025-26

14.1. Technological knowledge

Sl.No.	Category	Details of technologies	Area (ha)/ Number	Names of the team members involved
1	Technology Park/ Crop cafeteria	Agri Business School	1	SMS (Home Science)
		Coconut	1.6	SMS (Horticulture)
		Fruit orchard	0.4	SMS (Horticulture)
		Dry land Horticulture	2	SMS (Horticulture)
		Soil binding grass	0.10	SMS (Agronomy)

2	Demonstration Units	Green fodder production	1	SMS (Agronomy)
		Mulberry	0.4	SMS (Agronomy)
		Sericulture	0.04	SMS (Agronomy)
		Millet cafeteria	1.0	SMS (Agronomy)
		Terrace garden	0.002	SMS (Horticulture)
		Nursery unit	0.004	SMS (Horticulture)
		Banana	0.8	SMS (Horticulture)
		Curry leaf	0.4	SMS (Horticulture)
		Turmeric	0.4	SMS (Horticulture)
		Fodder Bank	0.4	SMS (Agronomy)
		Co-31 fodder sorghum	0.2	SMS (Agronomy)
		Azolla	0.0250	SMS (Agronomy)
		Stall fed goat unit	0.0400	SMS (Agronomy)
		Half rearing unit	0.0450	SMS (Agronomy)
		VAM Production unit	50	SMS (Soil Science)
		Coir compost unit	20	SMS (Soil Science)
		Vermicompost	200	SMS (Soil Science)
		Earthworm production unit	0.5	SMS (Soil Science)
		Vegetable mixture production unit	20	SMS (Soil Science)
		Vegetable mixture production unit	20	SMS (Soil Science)
		Neem and Pungam soap production unit	1	SMS (Soil Science)
		Soil conservation measures	100 Rmt	SMS (Agronomy)
		Hatchery unit	-	SMS (Animal Science)
		Poultry unit	0.05	SMS (Animal Science)
3	Lab Analytical services	SWPTL	700 Nos	SMS (Soil Science) & Lab Technician
4	Technology Week	Latest Agriculture Technologies	1	All KVK staff

**14.2 Technological products planned to be produced in the KVK during 2025-26
(Seeds, planting materials, livestock, bio-inputs and other inputs)**

Sl. No	Category	Name of the product	Quantity (q) or Number	Names of the team members involved
1	Seeds	Co-31	0.3 q	SMS (Agronomy)
		Azolla	0.2 q	SMS (Agronomy)
2	Planting materials	Co-4 & Co-5 fodder	50,000 Nos	SMS (Agronomy)
		Mulberry seedlings –V1	2,000 Nos	SMS (Agronomy)
		Coconut seedlings	1000 Nos	SMS (Horticulture)
		Turmeric	5 q	SMS (Horticulture)
		Vetiver grass	1000 Nos	SMS(Agri. Egg)
3	Livestock	Goat kid	50 Nos.	SMS (Animal Science)
		Heifers	5 Nos	SMS (Animal Science)
		Chicks	300 Nos	SMS (Animal Science)
		Eggs	500 Nos	SMS (Animal Science)
4	Bio-products	Production of Neem and Pungam soap	0.5 q	SMS (Soil Science)
		VAM Production unit	30 q	SMS (Soil Science)
		Coir compost unit	10 q	SMS (Soil Science)
		Vermicompost production unit	300 q	SMS (Soil Science)
		Earth worm production unit	0.2 q	SMS (Soil Science)
		Banana and Vegetable mixture	40 q	SMS (Soil Science)

14.3. Technological Information

14.3.1. Technology backstopping to line departments

S. No	Category	Technological capsules / Number	Names of the team members involved
1	Agriculture	Integrated Farming System	SMS (Agronomy)
		Quality seed production in Pulses	SMS (Agronomy)
		Pulses production technology	SMS (Agronomy)
		Millet production system-1	SMS (Agronomy)
		Integrated Farming System-1	SMS (Agronomy)
		Mixed fodder cultivation-3	SMS (Agronomy)
2	Horticulture	ICM in Coconut -1	SMS (Horticulture)
		ICM in Vegetables – 4	SMS (Horticulture)
		ICM in Banana - 1	SMS (Horticulture)
		Terrace garden techniques -2	SMS (Horticulture)
3	Agricultural Engineering	Micro irrigation system-2	SMS (Agri. Engg)
		Mechanization in groundnut-1	SMS (Agri. Engg)
		Farm Pond-2	SMS (Agri. Engg)
		Advantage of Chisel plow in Rain water harvesting -1	SMS (Agri. Engg)

4	Animal Science	Importance of grand supplement	SMS (Animal Husbandry)
		Poultry farming	SMS (Animal Husbandry)
		Mastitis- Detection, prevention and treatment	SMS (Animal Husbandry)
		Importance of fodder sorghum	SMS (Animal Husbandry)
5	Home Science	Value added products from fruits and Vegetables	SMS (Home Science)
		Value added products from millets	SMS (Home Science)
		Women empowerment through agribusiness school	SMS (Home Science)
		Importance of nutrition garden	SMS (Home Science)
		Value added products from Tribal resources	SMS (Home Science)
6	Electronic Media	Data base	Computer Programmer
7	Kisan Mobile Advisory Services	All	Computer Programmer

14.3.2. Publications planned

S. No	Category of publication	Number	Names of the team members involved
1	ICM in Bengalgram	100	SMS (Agronomy)
2	ICM in Groundnut	100	SMS (Agronomy)
3	Integrated Farming System	100	SMS (Agronomy)
4	Cotton cultivation Technologies	100	SMS (Agronomy)
5	Farm waste recycling	100	SMS (Soil Science)
6	Integrated nutrient management	100	SMS (Soil Science)
7	ICM in Coconut	100	SMS (Horticulture)
8	ICM in Vegetables	100	SMS (Horticulture)
9	ICM in Banana	100	SMS (Horticulture)
10	Terrace garden	100	SMS (Horticulture)
11	Value added products from millets	100	SMS (Home Science)
12	Value added products from fruits and Vegetables	100	SMS (Home Science)
13	Value added products from milk	100	SMS (Home Science)
14	Rain water harvest	100	SMS (Agri. Engg)
15	Goat farming	100	SMS (Animal Husbandry)
16	Clean milk production	100	SMS (Animal Husbandry)

15. Additional (Collaborative) Activities Planned during 2025-26

S. No.	Name of the agency / scheme	Name of activity	Technical programme with quantification	Financial outlay (Rs.)	Names of the team members involved
1	NABARD	Formation of FPO's	Formation of two Farmers Producers Organizations	1,00,000	All technical staff
2	NABARD	Market outlet	Establishment of Knowledge and resource center	1,00,000	All technical staff

16. Revolving Fund

16.1. Status of Revolving fund

Opening balance as on 01.04.2024 (Rs.)	Receipts during 2024-25 (Rs)	Expenditure incurred during 2024-25 (Rs.)	Closing balance as on 31.03.2024 (Rs.)
6,52,390.00	9,38,467.00	7,93,950.00	7,96,907.00

16.2. Plan of activities under Revolving Fund during 2025-26

S. No	Proposed activities	Expected output	Anticipated income (Rs.)	Name of the team member involved
1	Co 31	0.3 q	12,000.00	SMS (Agronomy)
2	Cotton fiber	10 q	45,000.00	SMS (Agronomy)
3	Co-4 & CO-5 fodder	50,000 Nos	75,000.00	SMS (Agronomy)
4	Mulberry seedlings –V1	2000 Nos	4,000.00	SMS (Agronomy)
5	Silk worm Cocacoon	4q	80,000.00	SMS (Agronomy)
6	Coconut seedlings	1000 Nos	1,00,000.00	SMS (Horticulture)
7	Coconut (nuts)	20,000 Nos	1,60,000.00	SMS (Horticulture)
8	Amla	2 q	2000.00	SMS (Horticulture)
9	Tamarind	12 q	6000.00	SMS (Horticulture)
10	Turmeric	5 q	20,000	SMS (Horticulture)
11	Fruit and vegetable processing unit	10kgs	10,000.00	SMS (Home Science)
12	Cereals and millets processing unit	Millet products – 100kgs	40,000.00	SMS (Home Science)
13	Processing of Coconut	200-liter oil and coconut oil-based soap 200 nos	30000.00	SMS (Home Science)
14	Vermicompost production unit	40 tons	2,00,000.00	SMS (Soil Science)
15	Earth worm production unit	50 kg	25000-00	SMS (Soil Science)

16	VAM Production unit	5 tons	150000.00	SMS (Soil Science)
17	Coir compost	5 tons	25000-00	SMS (Soil Science)
18	Production of banana and vegetable mixture	2 tons	320000.00	SMS (Soil Science)
19	Production of Neem and Pungam soap	1 q	50,000.00	SMS (Soil Science)
20	Goats	25nos	1,30,000.00	SMS (Animal Science)
21	Azolla	25kg	750.00	SMS (Animal Science)
22	Chicks	200	20000.00	SMS (Animal Science)
23	Eggs	300	3000.00	SMS (Animal Science)
24	Vetiver	1000	5000.00	SMS (Agri. Egg)

17 Activities of soil, water and plant testing laboratory during 2025-26

S. No.	Type	Through	No. of samples	No of soil health cards	Names of the team members involved
1	Soil	Mini soil testing lab	50	50	SMS (Soil Science) & Lab technician
		Traditional lab	600	600	SMS (Soil Science) & Lab technician
		AAS	-	-	-
2	Water		100		SMS (Soil Science) & Lab technician
3	Plant		-	-	

18. Plan of activity for Institutional Farm

S. No.	Activity	Area (ha)	Names of the team members involved
1	Cotton cultivation	0.8	SMS Agronomy
2	Banana	0.8	SMS(Horti)
3	Mulberry cultivation	0.4	SMS Agronomy
4	Co-31 cultivation	0.2	SMS Agronomy
	Co-4 and co-5 cultivation	2	SMS Agronomy
5	Millets cultivation	0.8	SMS Agronomy
6	Sesamam cultivation	0.4	SMS Agronomy
7	Orchard maintenance	0.4	SMS(Hort)
8	Coconut plantation maintenance	1.6	SMS(Hort)
9	Fruit cafeteria maintenance	3.6	SMS(Hort)
10	Turmeric	0.4	SMS(Hort)
11	Vetiver	0.1	SMS Agri.Engg

19. Demonstration units in KVK premises

S. No.	Name of Demo unit	Capacity for production (specify units)	Names of the team members involved
1	COFS-29	0. 3q	SMS (Agronomy)
2	Co 31	0.3 q	SMS (Agronomy)
3	Cotton fiber	10 q	SMS (Agronomy)
4	Co-4 & CO-5 fodder	50,000 Nos	SMS (Agronomy)
5	Mulberry seedlings –V1	2000 Nos	SMS (Agronomy)
6	Silk worm Cocoon	3q	SMS (Agronomy)
7	Coconut (nuts)	20,000 Nos	SMS (Horticulture)
8	Amla	2 q	SMS (Horticulture)
9	Tamarind	12 q	SMS (Horticulture)
10	Turmeric	5 q	SMS (Horticulture)
11	Fruit and vegetable processing unit	30 kgs	SMS (Home Science)
12	Cereals and millets processing unit	Millet products –100 kgs	SMS (Home Science)
13	Processing of spices and condiments	20kgs	SMS (Home Science)
14	Vermicompost production unit	30 tons	SMS (Soil Science)
15	Earth worm production unit	50 kg	SMS (Soil Science)
16	VAM Production unit	5 tons	SMS (Soil Science)
17	Coir compost	5 tons	SMS (Soil Science)
18	Production of banana and vegetable mixture	2 tons	SMS (Soil Science)
